

PERSONAL

16 July 1970

Dear Vladimir,

Attached is a letter addressed to Mr. Carman which may be of interest. You probably know, or have heard of Dr. Kutina. His reputation is very good indeed internationally, primarily as a structural man but he is also quite knowledgeable on genesis.

Mr. Carman and I feel that he could be most useful to your project. You know - the fresh look, fresh idea concept. Accordingly, if you give the work, we will start wheels moving to recruit him for perhaps one month in Somalia.

As you no doubt know, concurrence of governments is not required for engagement of consultants provided the mission does not exceed three months in duration. Nevertheless, it is usually sound strategy to inform the people concerned that you intend to obtain such services, if you find that such short mission will be beneficial for the project.

Kind regards.

Yours sincerely,

Mr. Vladimir N. Kozerenko,
Project Manager,
Mineral and Groundwater Survey, Phase II,
P.O. Box 744,
MOGADISCIO, Somalia
