

Descripción de las unidades cronostratigráficas. This section provides detailed descriptions for various geological units, including Quaternary, Pleistocene, Plioceno, Mioceno, Oligoceno, Paleoceno, Paleogene, Mesozoico, Paleozoico, and Precámbrico.

Table detailing the classification of geological units based on lithology and criteria. It includes columns for 'Litológica', 'Tipos de rocas', 'Volcánicas', 'Hipoabisales', 'Plutónicas', 'Volcanoclasticas', 'Sedimentarias', 'Metamórficas', and 'Depósitos', along with their respective symbols and descriptions.

Footer section containing the logo of the Servicio Geológico Colombiano, the title 'ATLAS GEOLÓGICO DE COLOMBIA 2023', the scale 'Escala 1:500 000', and a list of authors and contributors.

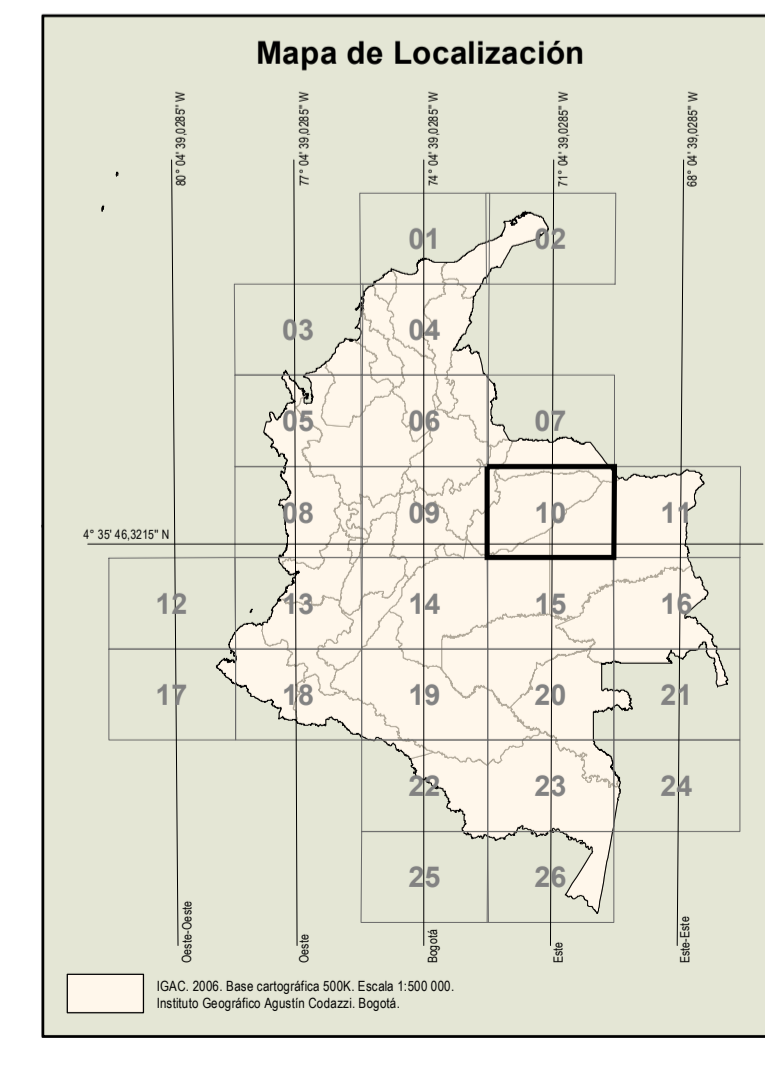

Table titled 'Fuentes de información' (Sources of information) listing various publications and reports used in the atlas, including geological maps and scientific papers.

Summary section (Resumen) providing an overview of the atlas, its objectives, and the data sources. It mentions the update of the geological map of Colombia and the inclusion of new data from 2019 to 2022.
